

Assignment 1 –Lab:

1. Getting Acquainted with the Linux Environment
2. Use various commands in Linux system.
3. As root, create a directory dbda and under it create a directory named test and create 100 files under it with name file1, file2..file100 - all this using a single command

```
root@paras: /home/vboxuser/dbda/test
root@paras:/home/vboxuser# mkdir dbda
root@paras:/home/vboxuser# ls
acl_file  dbda  Desktop  Documents  Downloads  Music  paras  paras.sh  paras.txt  Pictures  Public  snap  Templates  Videos
root@paras:/home/vboxuser# cd dbda
root@paras:/home/vboxuser/dbda# mkdir test
root@paras:/home/vboxuser/dbda# ls
test
root@paras:/home/vboxuser/dbda# cd test
root@paras:/home/vboxuser/dbda/test# touch file{1..100}.txt
root@paras:/home/vboxuser/dbda/test# ls
file100.txt  file19.txt  file28.txt  file37.txt  file46.txt  file55.txt  file64.txt  file73.txt  file82.txt  file91.txt
file10.txt  file1.txt  file29.txt  file38.txt  file47.txt  file56.txt  file65.txt  file74.txt  file83.txt  file92.txt
file11.txt  file20.txt  file2.txt  file39.txt  file48.txt  file57.txt  file66.txt  file75.txt  file84.txt  file93.txt
file12.txt  file21.txt  file30.txt  file3.txt  file49.txt  file58.txt  file67.txt  file76.txt  file85.txt  file94.txt
file13.txt  file22.txt  file31.txt  file40.txt  file4.txt  file59.txt  file68.txt  file77.txt  file86.txt  file95.txt
file14.txt  file23.txt  file32.txt  file41.txt  file50.txt  file5.txt  file69.txt  file78.txt  file87.txt  file96.txt
file15.txt  file24.txt  file33.txt  file42.txt  file51.txt  file60.txt  file6.txt  file79.txt  file88.txt  file97.txt
file16.txt  file25.txt  file34.txt  file43.txt  file52.txt  file61.txt  file70.txt  file7.txt  file89.txt  file98.txt
file17.txt  file26.txt  file35.txt  file44.txt  file53.txt  file62.txt  file71.txt  file80.txt  file8.txt  file99.txt
file18.txt  file27.txt  file36.txt  file45.txt  file54.txt  file63.txt  file72.txt  file81.txt  file90.txt  file9.txt
root@paras:/home/vboxuser/dbda/test#
```
